Dear SRP Customer,

Subject: Upcoming Construction Work

In order to ensure the reliable electric service you expect as an SRP customer, we must repair and maintain the electric system that serves your area.

SRP is preparing to replace old and damaged underground buried electrical lines. This will require construction that will affect your area, so we want to let you know about this activity. You may have seen SRP contract crews (Paramount Designs Inc. or Cardno TBE) doing preliminary work in preparation for the upcoming construction. Workers have been surveying the area, "blue-staking" or designating with paint the existing underground utilities and also digging to locate these facilities. Please be advised that SRP crews will also be inspecting electrical cabinets in the area of the project, necessary for the design and construction process.

The upcoming construction schedule depends on several issues, including acquisition of new easements and design feasibility. Upon receipt of this letter, we estimate it will take approximately six months to one year before we start the construction phase of the project. You will receive a detailed letter in the mail a few weeks prior to the start of construction. If there is a need for any planned power outages during the construction phase, you will receive advanced notification.

We appreciate your cooperation and hope the inconvenience to your property will be minimal. Thank you for your efforts to assist us in this project as we take the steps to achieve our goal of reliable and safe power service for all of our customers. If you have any questions about this project, please call me at **(602) 236-0454**. We encourage you to visit www.srpnet.com/installation to learn more about cable replacement projects and review frequently asked questions (FAQs).

Sincerely,

Paris Wyatt
